FEATURES

COMPATIBILITY, VERSATILITY & LAYOUT

- It can fix all sizes of Orphek OR LED Bar Lights.
- It will look very discreet and beautiful in any room.
- It will fit any tank glass till 20mm/0.78" maximum.
- It can hang any Orphek OR LED Bar Lights to the maximum of 125mm/4.92" height.

WHAT'S IN THE BOX

- ① -2 transparent acrylic vertical tank mount brackets (235mmx105mmx40mm/ 9.25"x4.13"x1.57")
- ② -4 M4 16mm aluminum alloy screws
- ③ -4 M6 16mm transparent acrylic screws
- ④ -4 M6 25mm transparent acrylic screws
- ⑤ -2 transparent acrylic clamps (71mmx44mmx50mm/2.80"x1.73"x1.97")

SO LET'S GET STARTED!

Before you start to assemble your Orphek AURA Fixing Brackets check:

VERY IMPORTANT! The glass of your tank can't be thicker than 20mm/0.78" and the maximum adjustable height is 125mm/4.92".

- if you have all the components (check the list below)
- disconnect your Orphek OR LED Bar from the electricity
- decide which is the best layout for your tank and only then choose where to place the brackets
- decide the height you wish to set for your lights according to your corals needs

Before you start to install your lights over your tank:

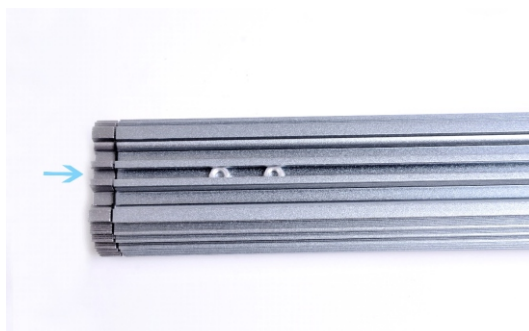

- check if all the parts assembled are perfectly placed and screwed, so it won't dismantle accidentally
- check if you have the skills and physical strength to mount it by yourself or you need a second hand to help you

Assembly of the OR lights with Orphek Aura and Placing the lights over your Tank

STEP 1 Assembly the Orphek Aura as the picture below:

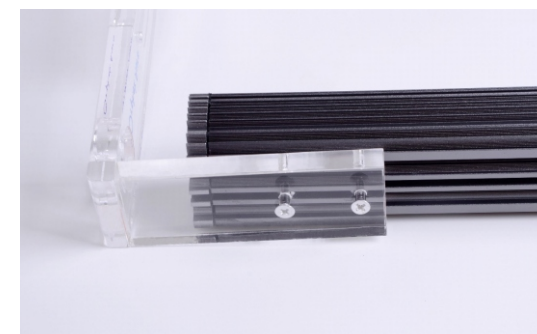

STEP 2 Place the 2 pcs of the M4x16mm Aluminum alloy screw nuts on the top of the Orphek OR LED bar light from the side as picture below:

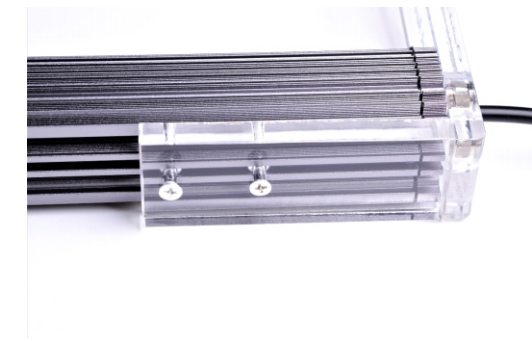

STEP 3 Before attaching the right transparent acrylic vertical tank mount bracket to the OR Bar light, you should put the light power cable through the hole as picture below:

STEP 4 Attach the left transparent acrylic vertical tank mount bracket to your Orphek OR Bar light and place/screw the screws by M4 16mm Aluminum screw head as picture below:

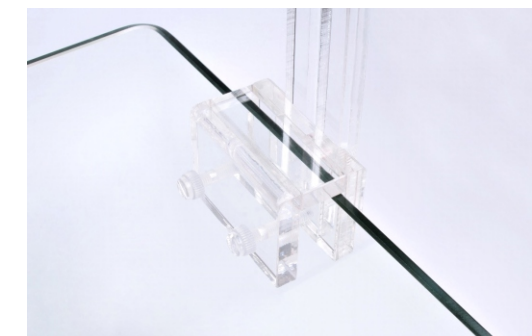

STEP 5 Attach the right transparent acrylic vertical tank mount bracket to your Orphek OR Bar light and place/screw the screws by M4 16mm Aluminum screw head as pic 05 below:

VERY IMPORTANT! Please notice, as we said before that the thickness of the glass tank can be 20mm maximum!!

STEP 6 Attach the clamps on the glass of your tank and fixing the 2 pcs of the M6 25mm transparent acrylic screws as picture below:

STEP 7 Check all the screws are fixed well, and proceed adjusting the height from the two sides by just loosening the M6 16mm transparent acrylic screws and adjusting the height then fixing the screws.

IMPORTANT! The maximum adjustable height is 125mm as seen in picture below:

After finishing mounting you are now ready to turn on your Orphek OR LED Bar light!
